AI Optimization Analysis Report

Analysis ID: cfdc4037-2195-4ebb-ab56-0c37c64d429f

Generated: 10/9/2025 3:17:55 AM

Framework: MASTERY-AI v3.1.1

Analyzed Website

<https://aimpactscanner.com>

55

Overall Score

Executive Summary

Performance Level: Moderate

Significant improvement potential across multiple factors

Key Insights:

- 18 factors analyzed using MASTERY-AI Framework v3.1.1
- Framework compliance score: 55/100
- Primary optimization focus: AI Response Optimization

Top Performing Factors:

1. [M.1.1] HTTPS Security: 100/100
2. [Y.1.1] Comprehensive Metrics Collection: 95/100
3. [M.2.1] Title Optimization: 85/100

Priority Improvement Areas:

1. [AI.1.5] Evidence Chunking for RAG Optimization: 0/100
2. [R.1.1] Citation Source Quality: 9/100
3. [T.1.1] Topic Knowledge Depth: 18/100

MASTERY-AI Framework Results

8-Pillar Optimization Framework Analysis

AI Response Optimization & Citation 30 Weight: 23.8% 4 factors	Authority & Trust Signals 50 Weight: 17.9% 3 factors
Machine Readability & Technical Infrastructure 76 Weight: 14.6% 5 factors	Semantic Content Quality 43 Weight: 13.9% 2 factors
Engagement & User Experience 65 Weight: 10.9% 1 factors	Topical Expertise & Experience 18 Weight: 8.9% 1 factors
Reference Networks & Citations 9 Weight: 5.9% 1 factors	Yield Optimization & Freshness 95 Weight: 4.1% 1 factors

Detailed Factor Analysis

AI Response Optimization & Citation

[AI.2.3] FAQ Schema Analysis

30/100

Evidence Found:

- Found 8 questions

Recommendations:

- Implement FAQPage schema markup

[AI.1.1] Citation-Worthy Content Structure

30/100

Evidence Found:

- Word count: 841
- Factual claims identified: 2
- Fact density: 0.22 claims per 100 words
- Limited factual content

Recommendations:

- Increase factual content with verifiable claims
- Add supporting evidence and data points
- Add more headings (H2, H3) for better content structure
- Include links to credible sources and references

[AI.1.2] Source Authority Signals

60/100

Evidence Found:

- Author information present
- Author credentials indicated
- References or bibliography section found

[AI.1.5] Evidence Chunking for RAG Optimization

0/100

Evidence Found:

- Content paragraphs: 1
- Sentences: 116

Recommendations:

- Structure content in 150-300 word chunks for AI processing
- Add headings and lists for better content segmentation
- Include internal links to connect related content chunks

Authority & Trust Signals

[A.2.1] Author Information

80/100

Evidence Found:

- Author information present
- Author credentials indicated

[A.3.2] Contact Information

35/100

Evidence Found:

- Contact section present
- Address information indicated

Recommendations:

- Add email contact
- Consider adding phone number

[A.3.1] Transparency & Disclosure Standards

35/100

Evidence Found:

- Funding source transparency present

Recommendations:

- Add disclosure statements for transparency
- Include conflict of interest information if applicable
- Explain your methodology and process
- Include publication and update dates

Machine Readability & Technical Infrastructure

[M.1.1] HTTPS Security

100/100

Evidence Found:

- Site uses HTTPS protocol
- Secure connection established

[M.2.1] Title Optimization

85/100

Evidence Found:

- Title: "AlmpactScanner - AI Search Optimization Analysis | Check Your AI Visibility"
- Length: 75 characters

- Title length is acceptable
- Good descriptive title
- Good keyword diversity

Recommendations:

- Consider shortening title

[M.2.2] Meta Description

85/100

Evidence Found:

- Meta description: "Free AI impact analysis for your website. See how ChatGPT, Claude, and Perplexity view your site. Get your AI optimization score in 15 seconds with 148 factors analyzed."
- Length: 169 characters
- Contains compelling call-to-action language
- Natural language flow detected

Recommendations:

- Shorten meta description to 150-160 characters

[M.3.1] Structured Data Detection

70/100

Evidence Found:

- Found 1 JSON-LD blocks
- Schema type: WebApplication
- RDFa markup detected

[M.2.3] Image Alt Text Analysis

50/100

Evidence Found:

- No images found on page

Recommendations:

- Consider adding relevant images

Semantic Content Quality

[S.2.2] Heading Hierarchy

50/100

Evidence Found:

- H1 tags: 1
- H2 tags: 0
- H3 tags: 0
- Proper H1 structure (exactly one H1)
- H1 length is appropriate

Recommendations:

- Add H2 headings to organize content
- Consider adding H3 tags for detailed organization

[S.3.1] Content Depth

35/100

Evidence Found:

- Word count: 841
- Sentences: 129
- Substantial content length (500+ words)

Engagement & User Experience

[E.1.1] Page Load Speed Optimization

65/100

Evidence Found:

- Page content size: 21 KB
- Images: 0
- Scripts: 6
- CSS files: 8
- Exceptionally lightweight page for optimal loading
- Resource preloading/prefetching implemented

Recommendations:

- Minify CSS and JavaScript files

Topical Expertise & Experience

[T.1.1] Topic Knowledge Depth

18/100

Evidence Found:

- Some technical terminology present
- Contains detailed explanations

Recommendations:

- Include more conceptual analysis and theoretical discussion
- Define key terms and concepts
- Include examples and case studies
- Compare different approaches or solutions
- Include current industry trends and recent developments

Reference Networks & Citations

[R.1.1] Citation Source Quality

9/100

Evidence Found:

- Total links: 0
- External links: 0
- Includes official/institutional references

Recommendations:

- Add external citations to credible sources
- Cite authoritative sources like academic papers, government sites, or industry leaders
- Add context around citations (e.g., "according to", "research shows")
- Diversify citation sources across academic, news, and official sources

Yield Optimization & Freshness

[Y.1.1] Comprehensive Metrics Collection

95/100

Evidence Found:

- Google Analytics/GTM implemented
- Structured data for rich metrics
- Open Graph metadata present
- Twitter Card metadata present
- Performance metrics tracking detected
- Conversion/goal tracking implemented
- Privacy compliance for data collection

Recommendations:

- Maintain current metrics collection

Prioritized Action Plan

Recommended optimization sequence based on impact potential

High Priority Items

1. [A.3.2] Contact Information (Authority & Trust)

Current Score: 35/100 | Critical for AI visibility improvement

- Add email contact
- Consider adding phone number

2. [AI.2.3] FAQ Schema Analysis (AI Response Optimization)

Current Score: 30/100 | Critical for AI visibility improvement

- Implement FAQPage schema markup

3. [S.3.1] Content Depth (Semantic Content)

Current Score: 35/100 | Critical for AI visibility improvement

4. [AI.1.1] Citation-Worthy Content Structure (AI Response Optimization)

Current Score: 30/100 | Critical for AI visibility improvement

- Increase factual content with verifiable claims
- Add supporting evidence and data points
- Add more headings (H2, H3) for better content structure
- Include links to credible sources and references

5. [AI.1.5] Evidence Chunking for RAG Optimization (AI Response Optimization)

Current Score: 0/100 | Critical for AI visibility improvement

- Structure content in 150-300 word chunks for AI processing
- Add headings and lists for better content segmentation
- Include internal links to connect related content chunks

6. [A.3.1] Transparency & Disclosure Standards (Authority & Trust)

Current Score: 35/100 | Critical for AI visibility improvement

- Add disclosure statements for transparency
- Include conflict of interest information if applicable
- Explain your methodology and process
- Include publication and update dates

7. [T.1.1] Topic Knowledge Depth (Topical Expertise)

Current Score: 18/100 | Critical for AI visibility improvement

- Include more conceptual analysis and theoretical discussion
- Define key terms and concepts

- Include examples and case studies
- Compare different approaches or solutions
- Include current industry trends and recent developments

8. [R.1.1] Citation Source Quality (Reference Networks)

Current Score: 9/100 | Critical for AI visibility improvement

- Add external citations to credible sources
- Cite authoritative sources like academic papers, government sites, or industry leaders
- Add context around citations (e.g., "according to", "research shows")
- Diversify citation sources across academic, news, and official sources
